

PURPOSE BUILT FOR YOUR WORK

NX Control™ gives every user an easy yet powerful tool to collect, view, and share GPR and project data. With just one app to learn across NEXUS-enabled systems, organizations can reduce training time, increase productivity, and lower costs.

Download NX Control on your own iOS or Android mobile device rather than purchasing a dedicated controller, reducing cost and simplifying device management.

With a single app, operators can move between GSSI systems with confidence while minimizing the learning curve. The result is a simple and scalable approach to GPR.

- Faster onboarding for new users
- Less time spent on training and retraining
- Greater workforce flexibility
- Consistent workflows across applications
- Improved productivity in the field

SYSTEMS COMPATIBLE WITH NX CONTROL

COMPASS NX

NX Control is included with Compass NX utility locating system, delivering a new standard of simplicity and performance to utility professionals everywhere.

- Familiar gestural controls for customizing data display
- Quickly toggle between antenna channels for fine details and deep penetration
- Easy GPS setup and downloadable basemaps add context to any project
- On-the-fly filters to enhance real-time decision making

NX15 DEEP TARGET & NX25 SMALL AREA SYSTEM

NX Control is compatible with NX15 and NX25 systems. Delivering the features you want and the flexibility you need, NX Control streamlines concrete inspection and helps you tackle the toughest scanning jobs.

- Use Quick Scan mode for fast, one-button scanning
- Use Project Mode for file management and workflows beyond the jobsite
- Toggle real-time filters to help you focus on what matters most
- Easily generate data images for field reports and other deliverables

WHY NX CONTROL?

DEVICE FREEDOM

Download NX Control on your own iOS or Android mobile device rather than purchasing a dedicated controller, reducing cost and simplifying device management.

FASTER USER ADOPTION

One intuitive workflow across multiple GSSI devices helps new operators become productive quickly and accelerate return on investment.

SIMPLIFIED TRAINING

Train crews on one interface rather than multiple software platforms, making it easier to deploy personnel across projects and applications.

OPERATIONAL CONSISTENCY

A common user experience reduces errors, improves confidence, and eliminates the need to learn different systems as your capabilities expand.

ALWAYS UP TO DATE

It's easy to stay current with new features and enhancements delivered through regular app updates.

FUTURE-READY INVESTMENT

As the NEXUS ecosystem grows, users continue to benefit from familiar workflows and a shared platform experience.
